

CHEMISTRY CANOPY

A welcome addition to Senator's Chemistry range is Chemistry Canopy. Canopy's soft and open design creates an inviting work area that has the correct balance of privacy, without a feeling of isolation.

A complement to Chemistry desking, Canopy's fabric covered panels with optional tech knit pockets can be used to pin and store inspirational materials. A magnetic dry wipe board both inside and outside makes clever use of the space.

Standard Features (*Selected models only)

- Extruded Aluminium frame
- Cast Aluminium connector joints
- Steel stabilising feet
- Fabric wrapped acoustic panels
- Magnetic dry wipe panel (dual sided)
- Luminated light with surface mounted switch
- Modular retro fitable design

Specifiable Features

- Single Canopy
- Double Canopy
- Back to back Canopy
- Tech knit Stretch pockets for storage

DESIGN

By Senator

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimise the impact on the world around us.

They come from all over the world,

but are based in our Design Centre located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test centre and prototyping lab.

CHEMISTRY CANOPY

A welcome addition to Senator’s Chemistry range is Chemistry Canopy. Canopy’s soft and open design creates an inviting work area that has the correct balance of privacy, without a feeling of isolation.

A complement to Chemistry desking, Canopy’s fabric covered panels with optional tech knit pockets can be used to pin and store inspirational materials. A magnetic dry wipe board both inside and outside makes clever use of the space.

SENATOR 3 R’S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R’s principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone’s battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

Reduce
Reuse
Recycle

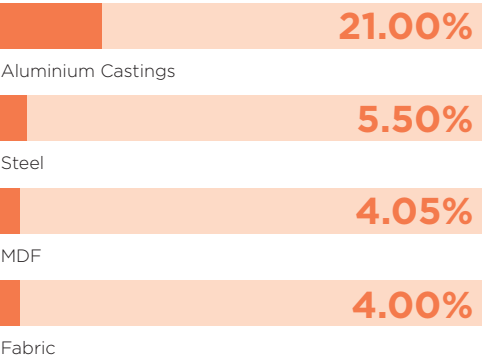

Material Content

Components are constructed of the following

Recycled Content

Contains up to 34.55% of Recycled Material

Recyclability

The range is 99% recyclable
