

SETME

SetMe is a new desking system.

As height adjustability plays an every increasing role in the modern office, SetMe offers one of the first and most comprehensive desking solutions where height-adjustment is at its core.

No more winding this or turning that.

No more you can't have that but you can have this. No more tapping fingers or disrupting your neighbors.

Various degrees of privacy and a comprehensive wire management, standalone or clustered up, SetMe looks but doesn't act like a traditional desking system.

DESIGN

By Senator

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimise the impact on the world around us.

They come from all over the world, but

are based in our Design Centre located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test centre and prototyping lab.

As height adjustability plays an every increasing role in the modern office, SetMe offers one of the first and most comprehensive desking solutions where height-adjustment is at its core.

No more winding this or turning that. No more you can't have that but you can have this. No more tapping fingers or

disrupting your neighbors.

Various degrees of privacy and a comprehensive wire management, standalone or clustered up, SetMe looks but doesn't act like a traditional desking system.

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

Reduce
Reuse
Recycle
